

Manual Trigger

1. Normal home screen
2. The user can swipe left on any of the events on the list to delete/ remove it from the list (+ other options/ share). This will help Vente to improve the user experience as the content will be customized after the users interests.
3. Swipe left to remove the event from the home screen. It will be possible to undo the action for a few of seconds after deleting. It will still be possible to see the events if the user searches for it.
